ULTRA HĒROS

Hēros, being the Greek word for leader seems to inherit this role for euphonium and baritone mouthpieces. This is the third main mouthpiece creation I have made since 1995 and I'm extraordinarily proud of it. It is wonderfully responsive, has a bigger sound in the high range, has a remarkably easy tone production and extraordinary stability throughout the whole of the euphonium's range. You will also notice a marked difference in the control of soft playing. It can sing and whisper better than any previous euphonium or baritone mouthpiece. It will enable you to be a fearless musician - *Steven Mead*
