# PERFORMANCE IN PRACTICE

NEEDING TO PRACTICE AT ODD TIMES AND IN ODD PLACES OVER THE YEARS (AND THE ABSENCE OF A SUITABLE MUTE) WAS THE REASON TREVOR BREMNER DESIGNED THE **SSH MUTE**.

Developed by internationally acclaimed cornetist Trevor Bremner MNZM, the **sshmute** has been successfully launched to answer a market need for an effective mute in a price range to suit budding musicians and professionals alike. Perhaps one of the primary benefits of the **sshmute** is the very small amount of back pressure it creates. This allows for better air supply, while still opening and developing the throat muscles. The mute also remains in tune and faithfully accurate.

“The **sshmute** is my favorite mute to use when I'm practicing in the wee hours of the morning, when I'm in a hotel room, or when I have to quickly warm up backstage!

It's low level of resistance creates an easier environment to silently practice while still maintaining good intonation and technical proficiency.”
